

## Some comments on the 11-13 weeks scan course

- Too long
- Very slow
- The music was irritating
- The spoken part was difficult to understand because of the accent of the speaker
- Very time consuming and if all the sonographers have to take this course patient care will suffer
- How about giving us CME for our time and effort to view this course???
- More information than I need to perform NT scanning
- As a sonographer with more than 10yrs experience it was very frustrating sitting through all of the ultrasound diagnosis info and not being able to fast forward

- Superb
- Great
- Masterpiece
- Excellent
- Brilliant
- Fantastic
- Phenomenal
- Amazing
- Impressive
- Wonderful
- The best course in the world
- Very helpful
- Well done
- Congratulations
- Extremely useful
- Easy to understand
- Really enjoyed it
- Great resource of information
- Learned so much
- Excellent images and explanations
- Great way to learn
- Very practical
- Very didactic
- Makes complicated subjects in fetal medicine simple to understand
- Some aspects too detailed for my level but very useful for my future
- Great model for online learning
- The best internet course
- Saves people time and money attending courses in person
- Thanks a lot for providing this service free to all sonographers

- Thanks a lot for this free disbursement of knowledge
- Very comprehensive, thorough and remarkably well presented
- Excellent content, clarity and presentation
- I have learned a great deal
- Appreciate all the hard work that has been put into this
- Thank you very, very, very much
- You made life much simpler for a young radiologist in India
- Thank you for this online course. I loved it. I live and work in rural Iowa and could not afford to attend a conference in person
- Thank you for making it easier for us in Namibia to obtain accreditation and knowledge
- I would like the course to be translated into Swedish too!
- An easy way to attend a course and repeat it as many times as you like  
Perhaps it is not necessary to know all the statistics directly, as long as you know where you can find it
- Great service to medicine and an ideal example of how distribution of knowledge should be in all aspects of medicine
- If technically feasible it would be great if you could add interactive games such as placing the calipers in NT. After all it is still true what Master Kong (Konfucius) said some 2500 years ago: I hear...I forget; I see...I remember; I do...I understand!
- The course is the revolution of contemporary fetal medicine and the cornerstone for the future of the our specialty. But Kypros don't forget that doctors need to believe in your philosophy and spend at least 20 minutes for a proper 11-13 weeks scan and not 10 minutes (as it happens in most fetal medicine centers in my country where they charge 200 euro and in your name make a lot of money to buy a Ferrari)

- Corso molto interessante e formativo. Grazie!
- Con una straordinaria capacità didattica semplice e comprensibile il Prof Nicolaides ha spiegato il significato dello screening delle anomalie cromosomiche, le basi teoriche, e le modalità di esecuzione. Grazie per questo corso
- Il corso è eccellente E' un ottimo ripasso che mi è servito e che continuerò a consultare Grazie
- Ottima idea di fare un'informazione on-line

- Gracias por enseñarnos continuamente.....Sus clases son espectaculares.....
- Me encantaría que tuvieramos disponibles más cursos on-line de esta calidad.
- los felicito por este curso que evidentemente nos resulta tan útil a personas como nosotros que estamos tan distante de los grandes centros como el vuestro...vería con agrado que fueran mas frecuentes independientemente de la certificación o recertificación. Muchas gracias y afectuosos saludos

- Merci de cette excellente mise à jour
- Très utile et très pertinent Merci
- Teste très clair. Merci de l'avoir traduit en français. Mlse à jour passionnante
